Hiring Manager, chainlink labs, Remote

Re: Security Engineer, Product Security

Dear Hiring Manager,

My name is Madhav Jadav, a graduate with a B.Tech-M.Tech Integrated CSE from the National Forensic Sciences University Delhi, with a strong focus on cybersecurity and a robust background in backend engineering. I hold a 2026 B.Tech-M.Tech Integrated CSE degree specializing in Cyber Security, and have honed my skills through 18 months of project-based experience, particularly in Rust, Go, Python, Java, C++, C#, Node.js, SQL, and microservices, with a keen interest and expertise in blockchain technology. My proficiency extends to REST APIs, gRPC, and GraphQL, and I am well-versed in managing databases like PostgreSQL, MongoDB, and Redis, as well as handling message queuing systems such as Kafka. I have hands-on experience with Docker, Kubernetes, and Helm, and I am adept at setting up CI/CD pipelines using GitHub Actions.

In my most relevant projects, I developed a custom blockchain application, RhinoChain, in Rust and Actix-web, which employs SHA-256 for secure digital asset custody logging, with robust authentication mechanisms using JWT, MFA, and RBAC on Kubernetes, achieving a 99.99% uptime. I also designed a FastAPI+Redis classifier API with sub-millisecond latency at 5K QPS and created a Kafka streaming pipeline. My skills align well with the requirements of the Security Engineer role at Chainlink Labs, as the company values innovation, and I am eager to contribute to the cutting-edge blockchain technology and security solutions.

Chainlink Labs stands out as a pioneer in decentralized finance (DeFi) by enabling the capital markets on the blockchain, and I am excited about the opportunity to work with a company that is shaping the future of finance. As someone open to relocation, I am confident in my ability to adapt to new environments and am eager to contribute to a team that is at the forefront of blockchain technology. I am looking forward to bringing my skills to the table and making a meaningful impact in the ever-evolving landscape of decentralized finance and blockchain security.

Thank you for your consideration. I would welcome the opportunity to discuss how my backend engineering experience can contribute to chainlink labs.

Yours sincerely,

Madhav Jadav
