Hiring Manager, Imnoo AG, Remote job

Re: AI CAD CAM IoT Engineer / Tinkerer CNC - Junior/Mid/Senior

Dear Hiring Manager,

I am a recent graduate with a B.Tech-M.Tech Integrated CSE degree from National Forensic Sciences University Delhi, specializing in cyber security with a strong foundation in backend engineering and blockchain technology. My project-based learning experience has honed my skills in multiple programming languages, including Rust, Go, Python, Java, C++, C#, Node.js, and my expertise in REST APIs, microservices, and gRPC, which aligns with the requirements of the AI CAD CAM IoT Engineer / Tinkerer CNC role at Imnoo AG. I have a proven track record of developing and deploying cutting-edge solutions that bridge the gap between AI and industrial applications, as evidenced by my work on the RhinoChain custom blockchain and high-performance authentication services running at 99.99% uptime.

My most relevant projects include developing a custom blockchain in Rust with Actix-web for digital asset custody logging and a FastAPI+Redis classifier API that achieved sub-millisecond latency at 5K QPS, along with a Kafka streaming pipeline for efficient data processing. I have also been recognized in hackathons and CTFs, demonstrating my ability to tackle complex challenges and work under pressure. These experiences have prepared me to be the mastermind connecting software algorithms directly to the factory floor, where I can leverage my skills in physical hardware integration and advanced cloud architectures.

Imnoo AG is a pioneer in using AI to revolutionize manufacturing processes, and I am eager to contribute my skills to this forward-thinking company. I am currently open to relocation and am excited about the prospect of working remotely, which aligns perfectly with my personal preference for flexibility and Imnoo's culture of innovation. I am particularly drawn to the opportunity to work on the intersection of software architecture and physical hardware, and I believe my skill set and passion for the field make me a strong candidate for the CAD AI Engineer role at Imnoo AG.

Thank you for your consideration. I would welcome the opportunity to discuss how my backend engineering experience can contribute to Imnoo AG.

Yours sincerely,

Madhav Jadav
