Hiring Manager, saifuro, Remote

Re: Smart Contract Engineer (Solidity, EVM)

Dear Hiring Manager,

My name is Madhav Jadav, and I am an ambitious individual with a strong background in backend engineering, having completed my B.Tech-M.Tech Integrated CSE with a focus on Cyber Security at Delhi's National Forensic Sciences University, where I graduated with a CGPA of 7.5 out of 10. My academic journey was complemented by 18 months of project-based experience, where I honed my skills in Rust, Go, Python, C++, C#, Node.js, REST APIs, microservices, and various other technologies. I am particularly proud of my work on RhinoChain, a custom blockchain built in Rust using Actix-web, SHA-256, and Proof-of-Work, which successfully achieved a 10K RPS with 99.99% uptime. I have also developed a robust authentication microservice using JWT+MFA+RBAC on Kubernetes, ensuring secure and efficient digital asset custody logging.

In my professional experience, I have focused on creating seamless and efficient backend systems, with a specialization in developing microservices and integrating technologies like Kafka streaming pipelines and Docker. I am well-versed in managing CI/CD pipelines using GitHub Actions and am comfortable working with cloud infrastructures, such as AWS EC2. My projects demonstrate my ability to handle complex backend systems and my dedication to maintaining high performance and uptime, which I believe aligns well with the requirements of the Smart Contract Engineer role at Saifuro.

I am enthusiimt about the opportunity to work at Saifuro and contribute to the AI-driven blockchain platform, where I can leverage my expertise in Solidity and Ethereum Virtual Machine (EVM). I am eager to join a forward-thinking team and contribute to the cutting-edge technologies that Saifuro employs. I am open to relocation and ready to commit to the company's mission of securing digital transactions and ensuring seamless customer experiences. My commitment to excellence, coupled with my technical skills and experience, makes me a strong candidate for this role.

Thank you for your consideration. I would welcome the opportunity to discuss how my backend engineering experience can contribute to saifuro.

Yours sincerely,

Madhav Jadav
